I married my husband, Paul, on September 7, 2007 in Carmel, California, and on July 17, 2008 we welcomed our son Noah to our family. Wenifer Liu says, "After I graduated from Pacific University with a BA in Business and Accounting, I decided I wanted to travel a bit and hold off being a working girl for awhile. So I thought I'd try teaching out since it's an excuse to go and travel. I took a month long intensive TESL certification course at Seattle University. Then did some job hunting and a couple interviews later I got a job in China. I teach for a company called English First, they have English schools all over the world, most of them are in China though. I've been teaching in Weihai for about 8 months now. I teach mostly young children from 5 to 10 years

old. The little ones are a lot of fun. My contract ends in December so I will be coming back home for Christmas. After that, I'm not sure what I'm going to do...I'll keep you updated."

2006

Luca Valle reports, "I just finished a 10 week research fellowship sponsored by the Howard Hughes Medical Institution for research in immunology at Occidental College. Our pilot project focused on learning more about the equine immune response to a bacteria that causes a disease called "Pigeon Fever" in horses. Now, we're working on getting our data published in either the "Journal of the American Veterinary Medical Association" or the "Journal of Immunology". It was an amazing summer experience and a good exercise in balancing research with Disneyland and BodyWorlds. I'm really looking forward to continuing the project at Occidental next semester!"
